*Plant capacity is based on 150°C from mixer. Average moisture content of 3%, including 5% filler and 5% bitumen in the mix at sea level with 30°C ambient temperature, 45 second weigh/mix cycle, 80 batches per/hr.

Benefits

- Flexible plant layout - with low or high level options
- Complete plant designed for ease of access and maintenance
- High thermal efficiency dryer with proven replaceable lifter design
- Nylon designed support and thrust rollers for reduced dryer wear & noise
- Fully automatic multi-fuel burner options
- Asphalt feed systems (RAP) and SMA fibre/additive systems available

StarBatch Range

Modular Asphalt Batch Plant

The Parker StarBatch range has been designed to offer customers worldwide a lower capital cost asphalt plant while still maintaining many of the StarMix range features.

Capable of producing a wide range of high quality mixes, this European designed modular asphalt plant is now being manufactured in India.

Utilising the latest technology the StarBatch range offers customers a cost effective and versatile solution to meet the demands of any modern day road project.

Options

- Fully automatic multi-fuel burner
- High level integrated mixed material storage
- Reclaimed dust systems
- Imported filler silo
- Reclaimed asphalt feed system (RAP)
- SMA fibre and additive systems

Cold Feed

Compact transportable multi-hopper, cold feed unit with built in collecting conveyor, scalping screen and dryer feed conveyor. Direct drive geared motor units provide high reliability and accurate variable speed control via AC motor and inverter.

Aggregate Dryer

Advanced design of internal lifters optimising thermal efficiency for maximum heat transfer. Nylon support & thrust rollers to reduce wear on dryer roller paths and noise. Choice of multi-fuel burners available.

Screen

Heavy duty aggregate screen within a fully enclosed and sealed dust housing.

Paddle Mixer

Fully synchronised direct drive twin shaft paddle mixer with abrasion resistant liner plates, paddle arms and tips.
